About this item

- 100 % UV-protection dual lens: Double injection moulding process for lenses. 100 % UV protection and anti-fog. Effectively protects eyes, effectively preventing damage caused by UV radiation.
- High-strength PC and TPU material: The TPU material used for the frame is highly flexible, meaning that it will not result in injury to the eye in the event of a blow; the high-strength PC material used for the lenses is scratch-resistant, impact-resistant and wind-proof, among other features.
- Thick foam design: 3-tier breathable memory foam. Lightweight, breathable, warm, fits your face perfectly.
- Ventilation system: The lens and the top of the frame have ventilation holes that are capable of retaining warmth and providing ventilation to ensure that you don't become hot and uncomfortable.
- Compatible with glasses: You can place the glasses inside the frame using a buckle. Head band and removable lens. And a range of vibrant colours. Have fun skiing!
